

# Exercise 1: Setup

Marcy Shieh

9/10/2020

1. Apply for a GitHub Pro account.
2. Create a new repository called `misc` on GitHub.
3. Clone the `misc` repository on to your computer using RStudio.
4. Create a R Markdown document and save it in the `misc` folder on your computer.
5. Revise the R Markdown document with information you would put on your CV. This may include:
  - Name
  - Department address
  - Email address
  - Website
  - Other contact information
  - Education
  - Research experience
  - Teaching experience
  - Conference presentations
  - Awards and fellowships
  - Service/volunteer work
  - Professional work experience
  - Language and skills
  - References
  - Other

We will transport this information on to a CV template in our exercise next week.

6. Knit the R Markdown document as both a PDF and HTML file.
7. Push all the files to the `misc` Git repository.
8. Email me ([mshieh2@wisc.edu](mailto:mshieh2@wisc.edu)) the link to your `misc` repository when you are done.
